DETAILED ACTION

Drawings

1. Figures 16A-16B AND 17A-17D should be designated by a legend such as -- Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Election/Restrictions

3. Applicant's election without traverse of Group I in Paper No. 4 is acknowledged.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-2 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Kunitomo et al. (US 5,622,590, hereinafter, Kunitomo.)

6. In regard to claim 1, in figs. 3-4, Kunitomo discloses a circuit substrate 11 for packaging a semiconductor device, the circuit comprising:

input/output terminal electrodes 12 formed on a surface of a main body of the substrate;

conductive adhesive layers 13 adhering onto the terminal electrodes; and

resin film 14 formed on the surface of the substrate so as to cover the adhesive layers and the electrodes.

In regard to claims 2 and 10, together with the above discussions, Kunitomo further discloses the adhesive layers are placed in positions on the surface of the resin film corresponding to the terminal electrodes on the surface of the substrate.
